

UIO G FLARING GOR CONTROL WAIVER

Serial No.: CCGP/004^a

Date: 2015^b/03^c

Category^d: Excess of GOR limit (3*RSI or 5,000scf/b) ☐

Compressor-system outage ☐

NAG Flaring ☐

AG flaring ☒

others ☒

Waiver Start Date/Time: 6th MAR 2015

Waiver End Date/Time: 17th MAR 2015

Facility Name	Cawthorne Channel 1/2/3 CCGP.
Flare (or AG) Volume ^e (mmscfd)	14.8 MMscfd (2.8boepd)
Associated Oil Production ^f (mbopd)	11.2Mbopd
Reason for flaring (or HGOR production)	<p>Due to current spate of flow line and Wellhead equipment vandalism, total AG from the six flowing Wells in CAWC/1, CAWC/2 and CAWC/3 is insufficient to meet the minimum input requirements of the 75mmscfd compressor at CCGP. Work is in progress to Install CCU for two wells, (well 42 and w/45T). With the addition of these Wells, CCGP will be restarted.</p> <p>Updates:</p> <p>The power issue with the solar turbine (CCGP primary power supply) has been resolve and Awoba GP export has been lined up for (NewCross) to come on stream. Installation of CCU units awaits arrival of crane. ETA of Barge was 5-March but has been delayed due to picketing at KI by community contractor personnel since 4-March. Adjusted ETA for Barge is 9th March. LEC for CCU installation is now 13-March (two days per CCU due to tidal pattern). JTF has taken pro-active action to forestall theft of the CCU post installation. CCGP Restart and stabilization is planned for 13th to 16th March. With the above reason, the revised is 16 of March 2015.</p>
Justification for waiver request	Waiver is required to support the continued production of CAWC 1, 2, 3 while solution is being worked

	Originator: Asset/Project/Area Dev. Mgr	Agreement: GM/Lead - (Asset/Project/Dev.)	Supported (SCiN only): GM Flared Gas
Name	Oni Olatunbosun O	Kulawski Grzegorz. J.	Akosa Obi
Job Title	Asset Manager (Swamp-East)	GM Onshore Assets	Production Services
Signature			
Date			

Approved by the GM Onshore Assets:

Signature and Date:.....

Distribution List :

Gabon: Signatories + Asset Lead/Technical Manager/Operations Manager/Finance Manager/Head of Production
Programming/Senior Production Programmer/Head of Planning & Economics/Head of HSE

Nigeria: Signatories + Operations Manager/Senior Operations Support Engineer/Senior Gas Accountant/Senior
Programmer/Maintenance Systems Manager/ Production Surveillance and Support Manager.

^a The request number specify district reference indicator and serial number from 001

^b The year of the request

^c The month of the request

^d Please tick the appropriate box

^e please specify amount of gas to be flared per day

^f please specify potential net oil per day that would have been produced if the gas is flared
