

## ERT TO SWAMP EAST ASSET TEAM HANDOVER

### (AKASO W/3 WELLHEAD FIRE).

#### INCIDENT BACKGROUND:

At about 22:30 hrs on the 2<sup>nd</sup> November 2014, the Swamp East Operations Manager escalated to the ERT a report of fire outbreak on Akaso Well 3 located in the Cawthorne Channel District. Production rates for Akaso well 3 earlier was 3L 2272bopd & 2.7MMscf/d and 3S 2159bopd & 2.19MMscfd. First and second line wellhead maintenance activities were carried out on 28/05/2014. The well had green status (eWims) prior to the CCU and actuator removal by unknown persons observed on 13/06/2014 by the Asset team and was isolated using the production master & wing valves.

#### STRATEGIC OBJECTIVES:

In line with PEAR, the strategic objectives of this response where:

- ✓ Reconfirm flow line isolation at the flowstation.
- ✓ Confirm reported fire, fire location and potential threat to community settlements.
- ✓ Conduct SAR for 3<sup>rd</sup> party fatality.
- ✓ Conduct overflights.
- ✓ Develop response strategy.
- ✓ Continue security arrangement and sustain FTO
- ✓ Deploy personnel and equipment to incident site.
- ✓ Extinguish fire and isolate wellhead.
- ✓ Contain free phase crude oil.
- ✓ Recover free phase crude oil.
- ✓ Conduct JIV.
- ✓ Secure Akaso W/3L and 3S.
- ✓ Demobilize ER team

(Green Closed Red Outstanding)
